

Hospitals critical suppliers are deeply integrated with day-to-day operations, and it is the successful management of these suppliers that delivers a competitive advantage leading to a better sustainability and less environment impact. At the same time, digital acceleration and the need for agility have expanded the role of procurement and finance from cost-management functions to broader champions and leaders of risk management, strategic decision making, and efficiency

WHAT THIS PROJECT IS ABOUT?

- Transforming Procurement through co-creation
- Building a strong internal network to drive interdisciplinary collaboration
- Increasing visibility and importance of procurement
- Building strategic procurement and leadership
- Increase transparency (knowledge transfer, benchmarking)
- Implement Joint Cross-Border Procurement
- Create pilot use cases
- Train-the-Trainers
